

MEMORANDUM

DATE: September 25, 2026

SUBJECT: Weekly Construction Update & Lookahead (**September 28th – October 2nd**)

North Site:

- The demolition of the parking structure is nearly complete, the remaining demolition of the garage foundation walls will coincide with the shoring work
- Shoring program is ongoing, the shoring involves drilling along the property line, this work will generate noise from the drill rig.
- We anticipate between 6-8 concrete trucks to be active on site each day during this phase.
- Dump trucks will continue to be active on site to remove debris from the garage and spoils from the shoring.
- Loud equipment will be used during permitted work hours during the demolition

South Site:

- No activity

55 Brownlow:

- No activity

General:

- Traffic control will continue to ensure safe access for pedestrians, cyclists, and vehicles at both North and South sites when construction vehicles are entering/exiting the sites.
- We are not expecting any road closures on Soudan Avenue or Brownlow Avenue.
- **What is shoring:** Shoring is the installation of temporary supports, such as steel beams or metal props, to keep soil or surrounding structures from shifting during construction or excavation

Community Considerations:

We remain committed to minimizing construction impacts on the neighborhood.

- **Safety:** Dedicated traffic control personnel will be present during key operations to ensure safe passage for all road users.
